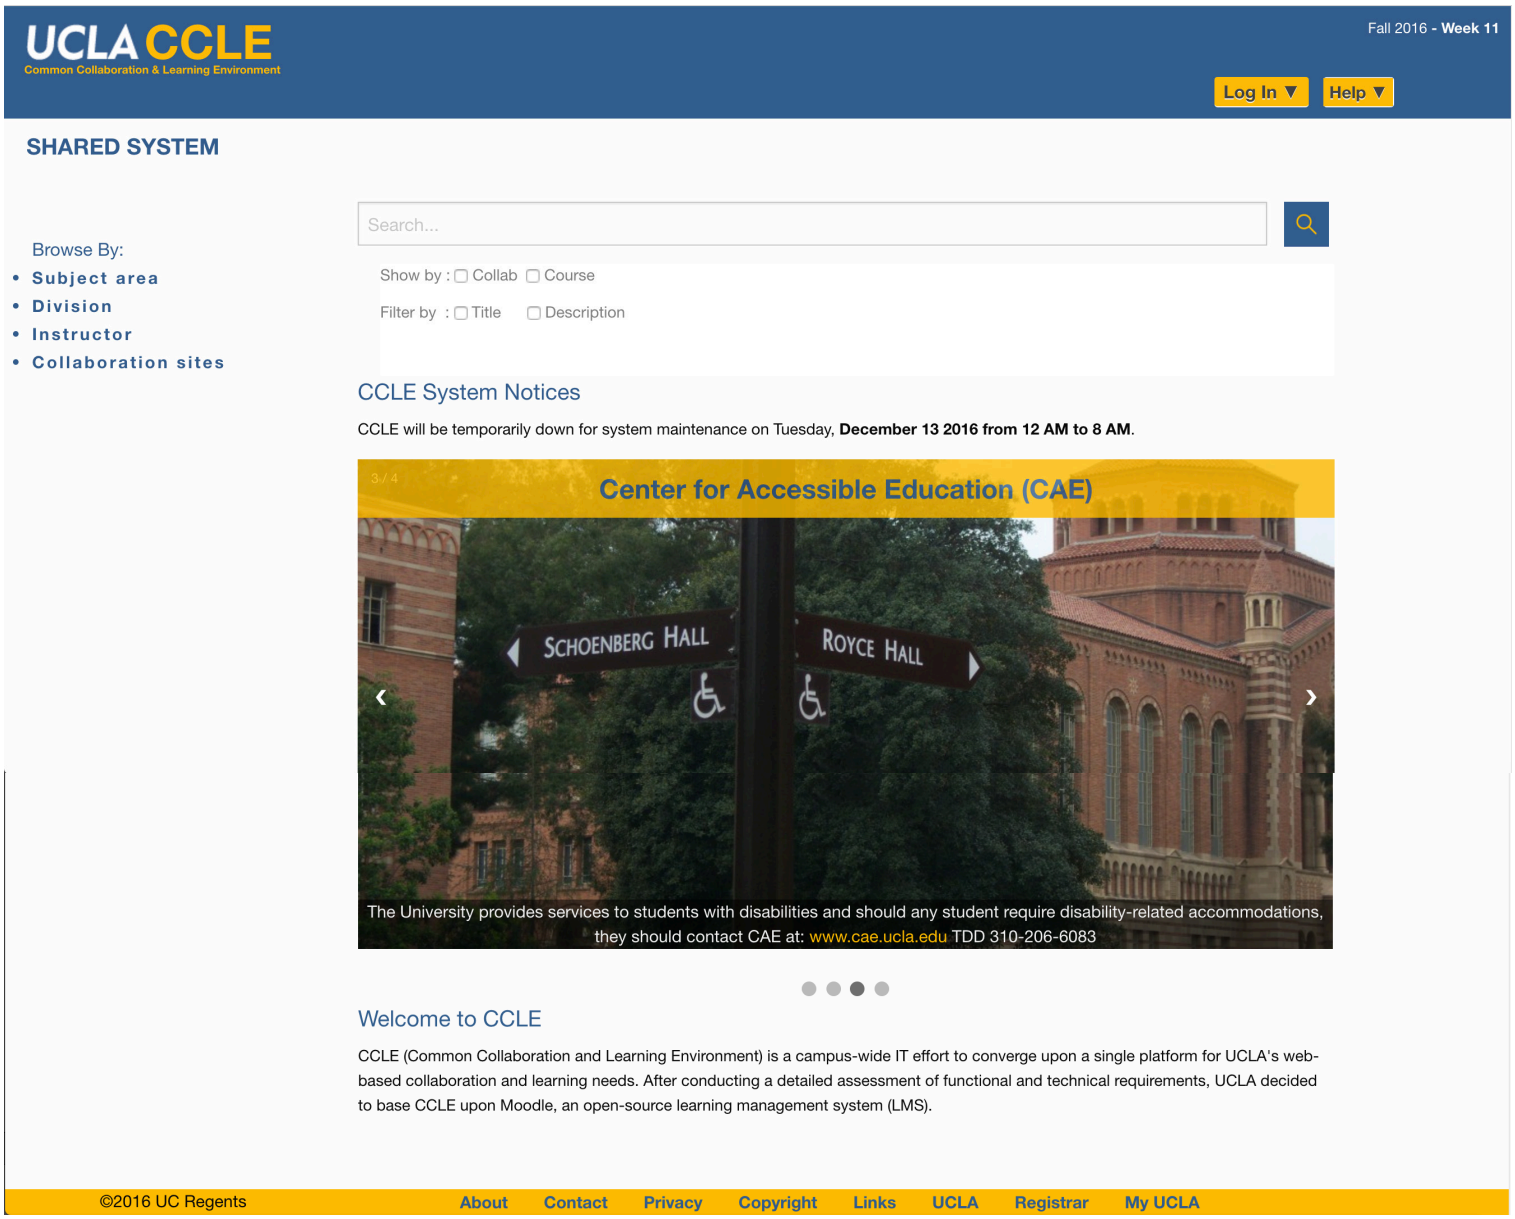
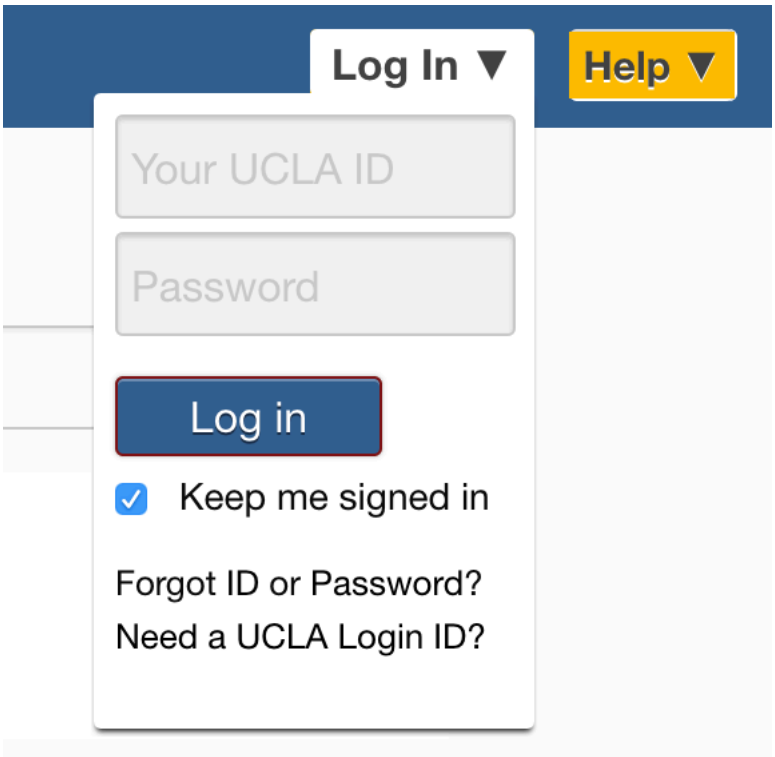
Final Redesign Desktop & Laptop

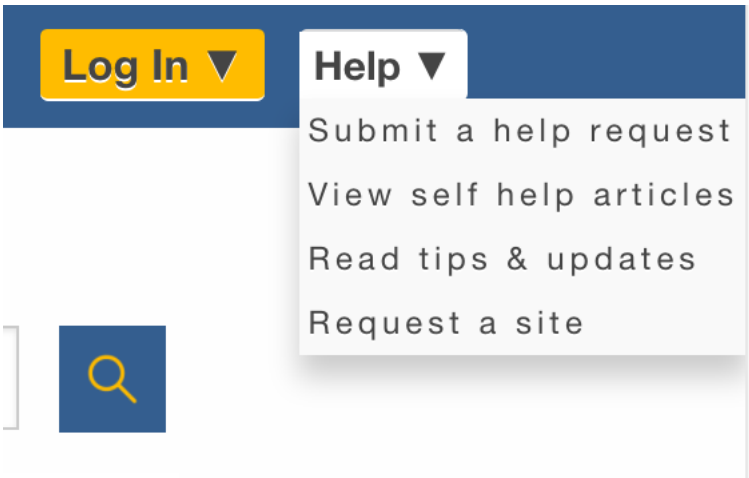


Final redesign broken into sections (as per ranked importance)

1. UCLA CCLE **Logo** placed on top left of the page as being consistent with the UCLA brand.

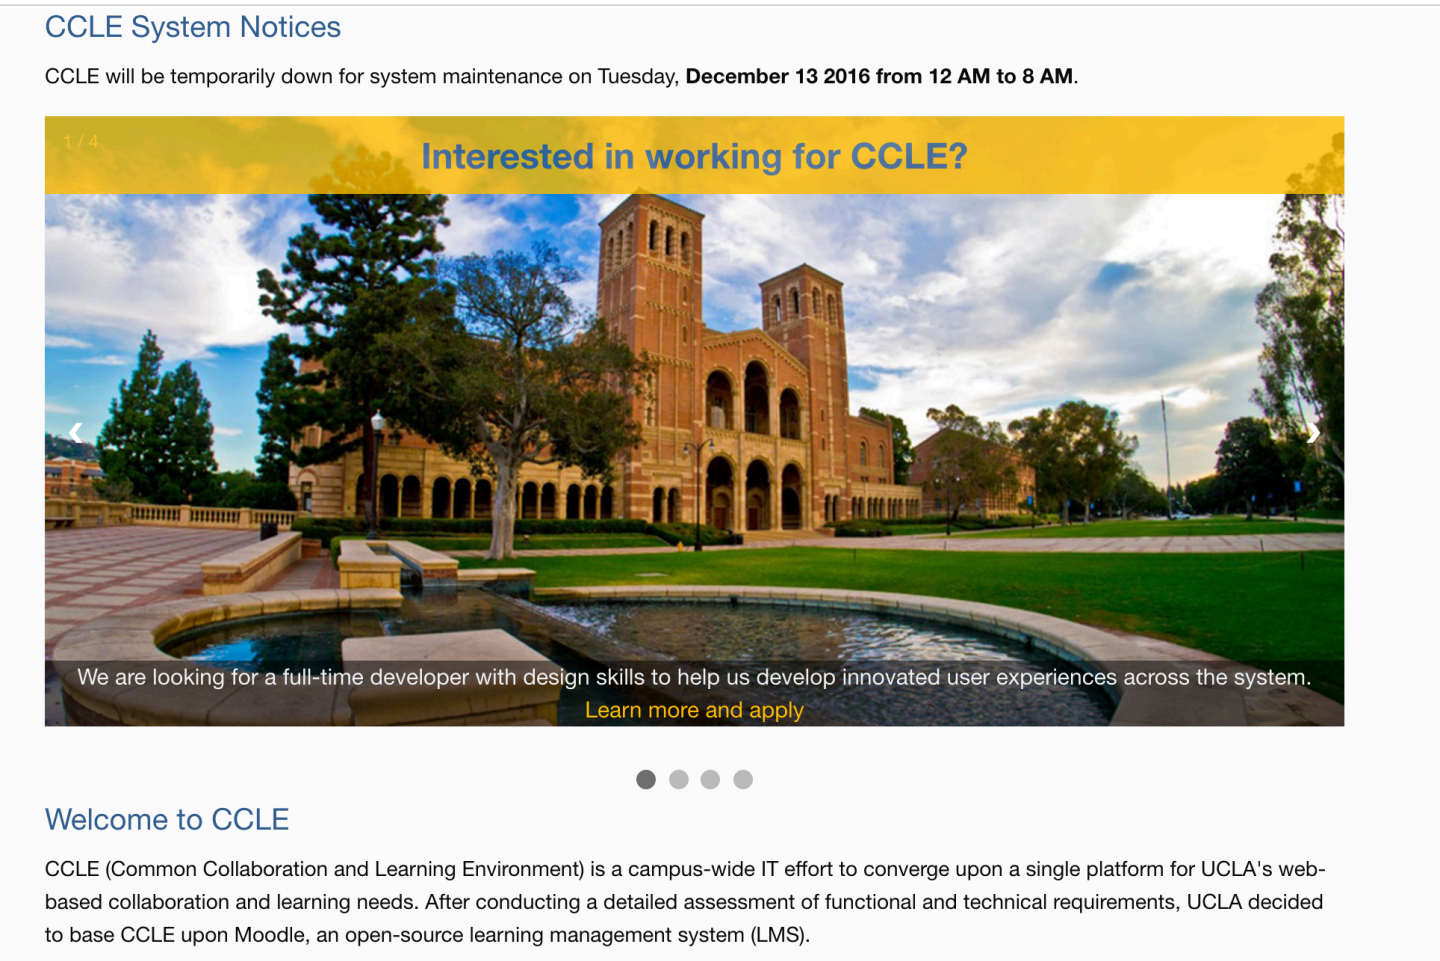


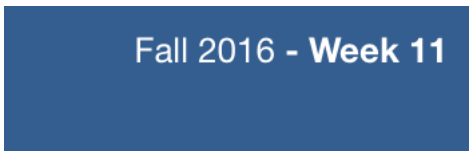
2. **Login Link** with dropdown content to fill in UCLA ID and password. This is an easier step for the user without going to a new page. He can login on the current page itself. He is also given the option of 'Keep me signed in' check box. He can also click on 'Forgot ID or password' and 'Need a UCLA Login ID'.



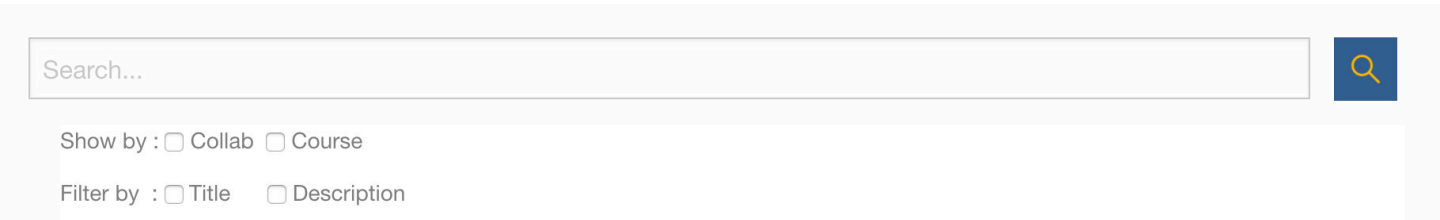
3. **Help Link** with dropdown content for options where the user can click.

4. **Notices** given with the maintaince update on top and the rest in slideshow form where each image stands for each notice and the user can manually go through all of them using the toggle round buttons or the side arrows. The heading of each notice is highlighted in a yellow bar and the information is given at the bottom. Below the image is an introduction to CCLE.

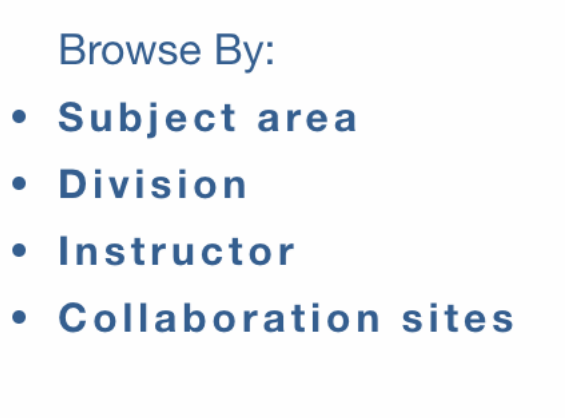




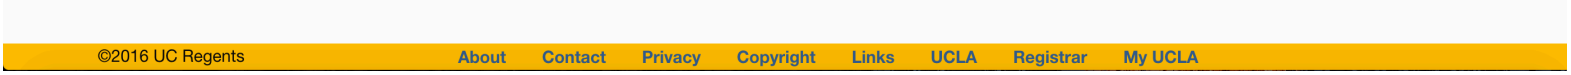
5. **Week Display** placed on top right of the screen where once the user opens this page he can see which week is going on



6. **Search** bar with the enter button as a magnifying glass with the UCLA colors. The filters are placed below in grey with checkbox.

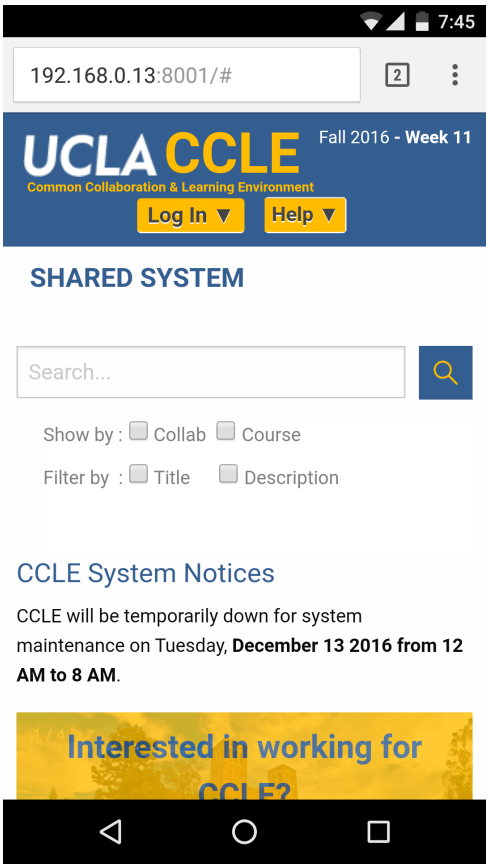


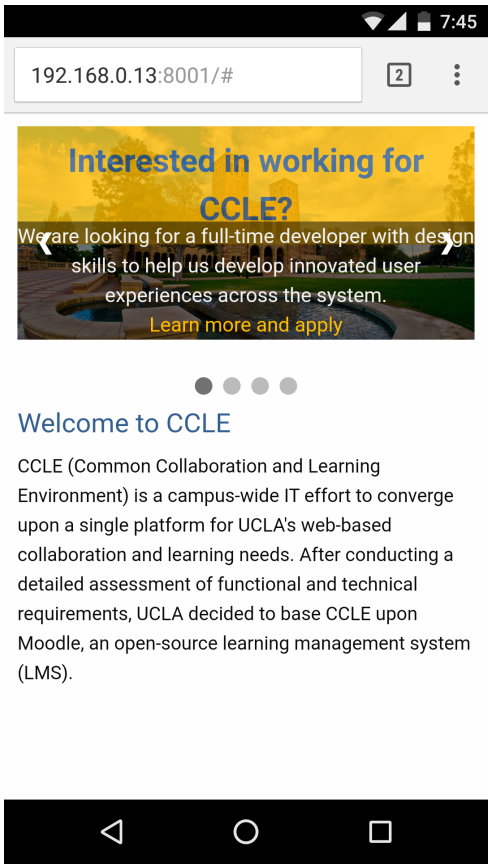
7. **Browse by Links** placed on the left side of the page. Each bullet point that takes the user to the respective page. When used in a mobile device this goes below the notices and welcome info.

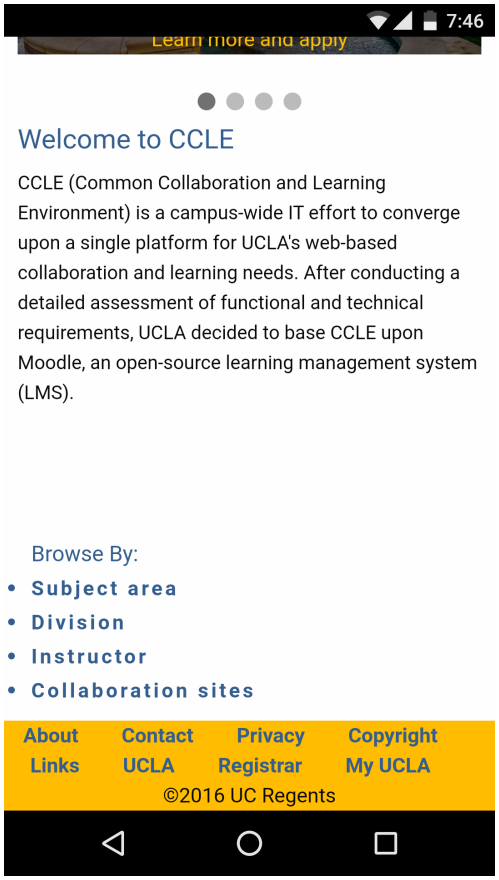


8. **Footer with Links** bar placed at the bottom of the page giving info on each link when clicked on. From the originl site I removed 2 links which were the, CAPS and CAE as they are already mentioned in the notices slideshow.

Final Redesign Mobile friendly : Responsive

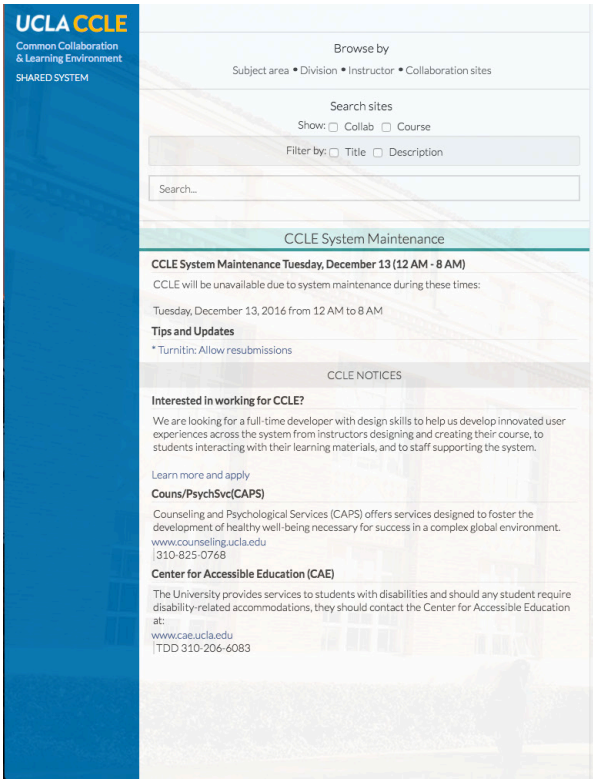


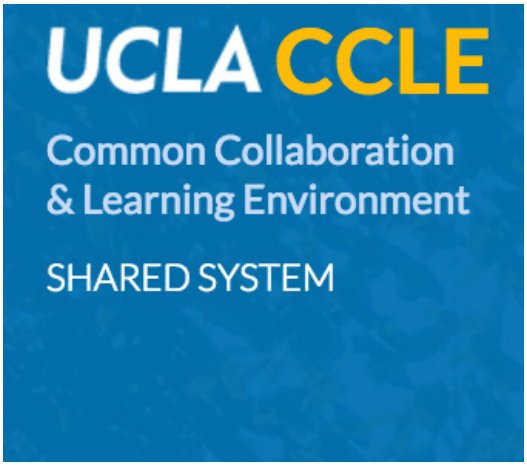




Task : Redesign of the non-logged in page for ccle.ucla.edu.

Given : Github Repo , UCLA brand guidelines , Foundation

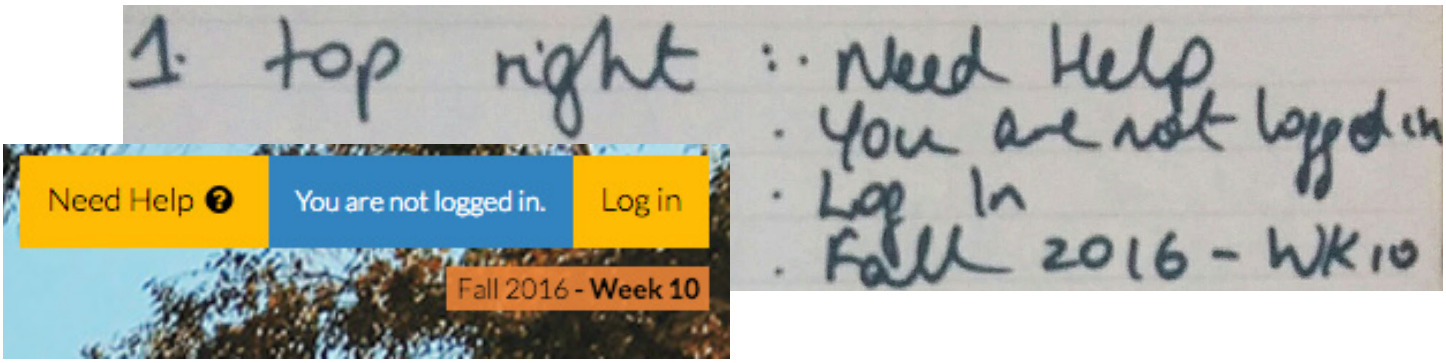


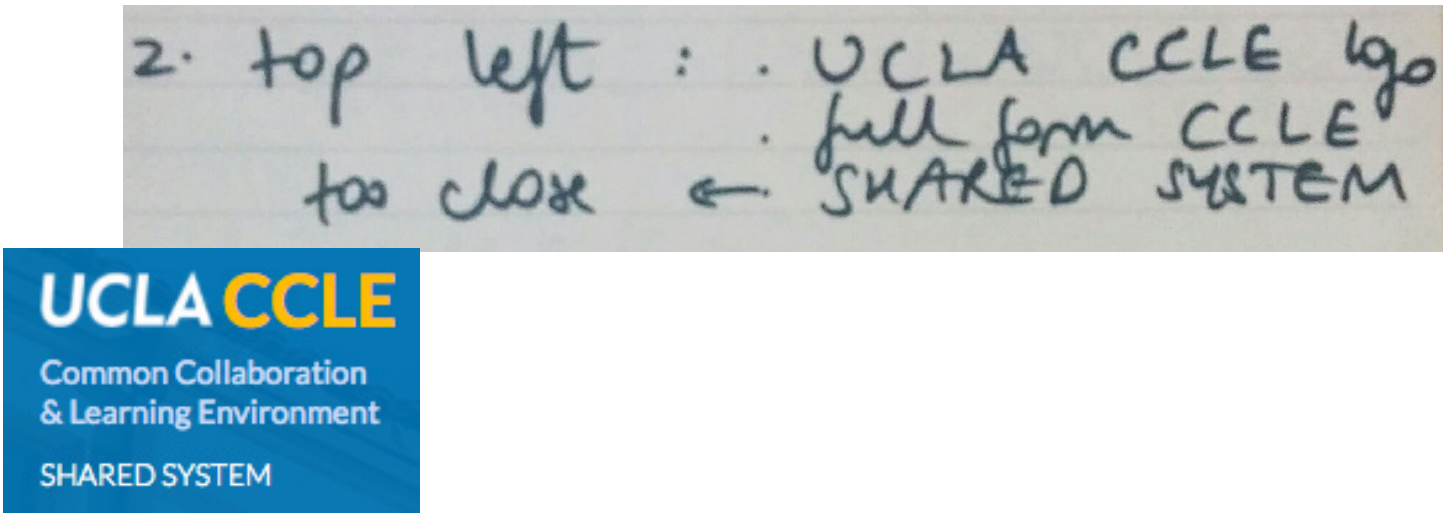


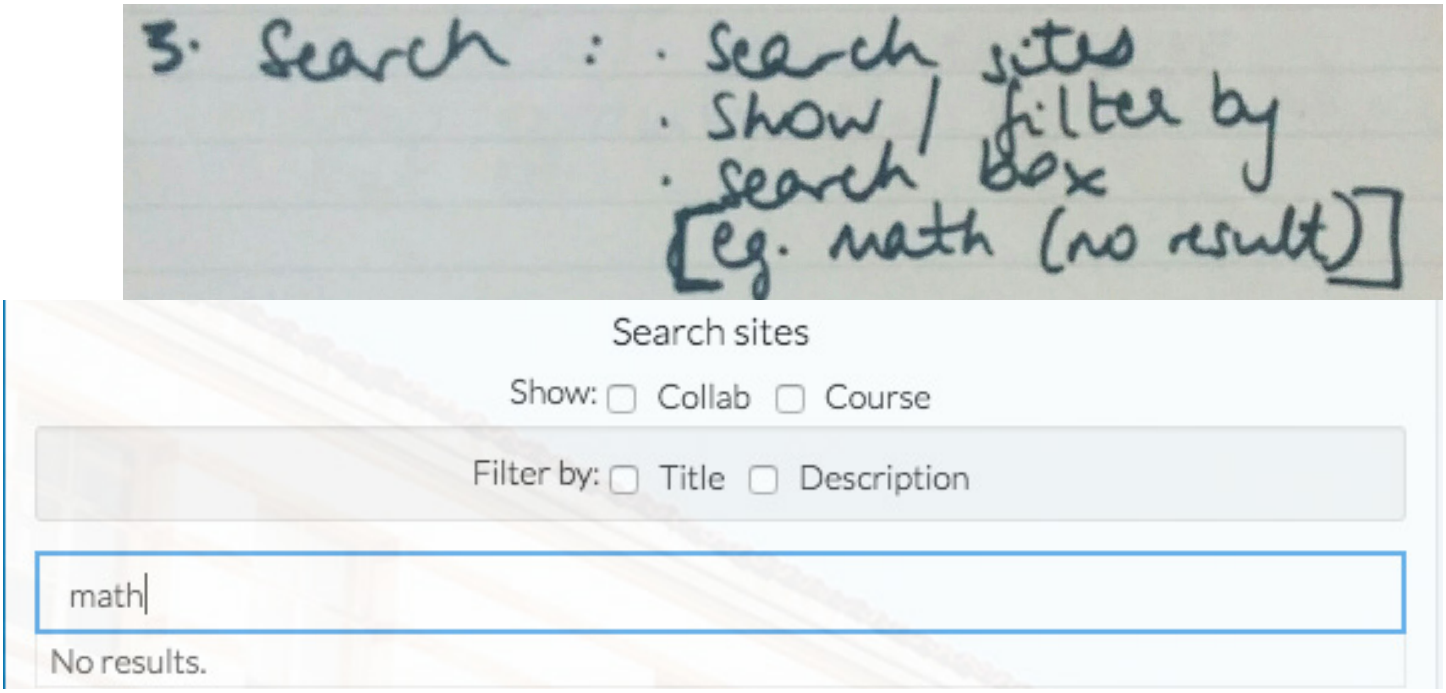
Must haves (ranked by importance)

1. Logo
2. Login link
3. Help link
4. Notices
5. Week display
6. Search box
7. Browse by links
8. Footer links

Current webpage : Broken into sections







4. Browse by : * no bullet before Subject
4 areas
row arrangement

Browse by

Subject area • Division • Instructor • Collaboration sites

5. CCLE System (Maintaince) :
- blue highlight
- Maintaince line in 3 lines
'unavailable' is negative
- Tips & Updates

CCLE System Maintenance

CCLE System Maintenance Tuesday, December 13 (12 AM - 8 AM)

CCLE will be unavailable due to system maintenance during these times:

Tuesday, December 13, 2016 from 12 AM to 8 AM

Tips and Updates

* Turnitin: Allow resubmissions

6. CCLE Notices :
- 3 areas
- heading, body, link
- lot of info presented

CCLE NOTICES

Interested in working for CCLE?

We are looking for a full-time developer with design skills to help us develop innovated user experiences across the system from instructors designing and creating their course, to students interacting with their learning materials, and to staff supporting the system.

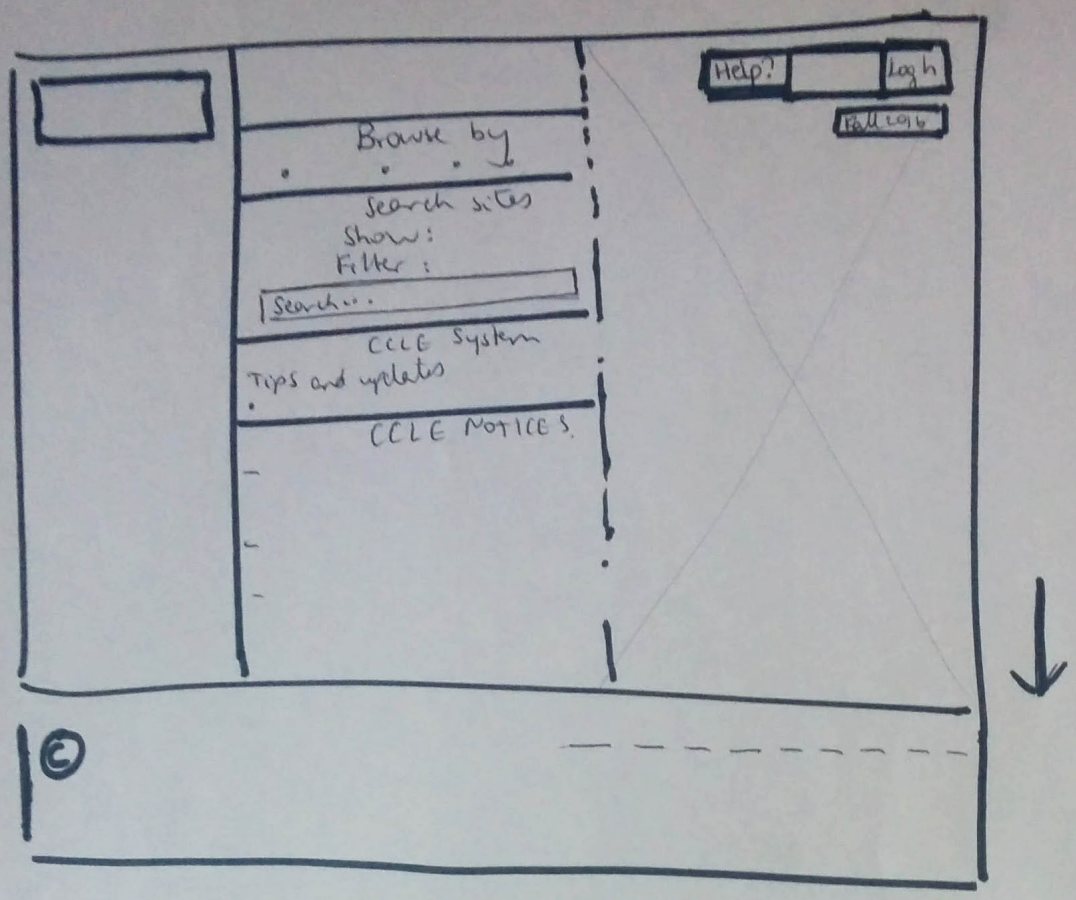
UCLA CCLE front page - Desktop



Un-needed [Desktop]

- You are not logged in
- You are currently using guest access

] Top Right

- Image that occupies full right side of page

Misleading

- Search.... shows no results until 'enter'
- Filter option below search
- Shared system part of logo

Redesign factors

- Clarity
- Spaced out evenly
- Hierarchy

Color for buttons / imp

yellow - for help & log in.

orange - week display

blue - left ~~bar~~ side of page

green - CCLG System highlight

black - footer bar

Notes to keep in mind

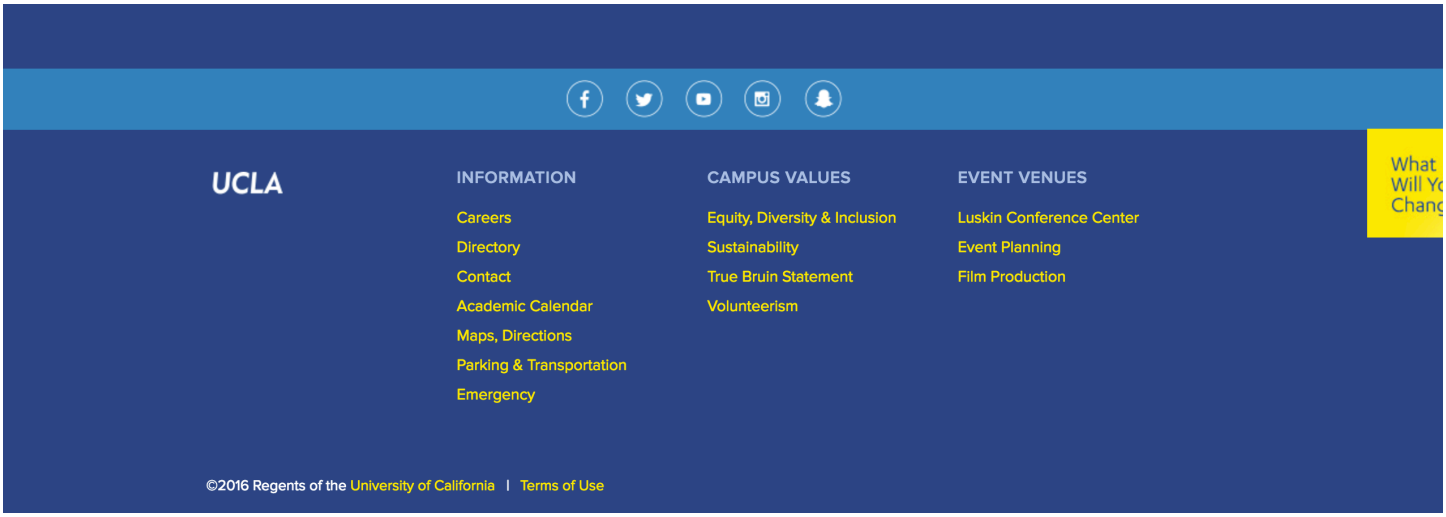
UCLA brand & website.

Logo is always on the left top corner

no toggle, ~~because~~ no sliding menu

Keep Consistency

UCLA Brand



Taken into consideration from UCLA Brand guidelines

1. Logo placement
2. Color and color bars (UCLA blue and yellow)
3. Slideshow of images for stories and information
4. Menu bar showcase
5. Search box on top right
6. Footer links direct and centered
7. Consistency in tone
8. Straighforward

Welcome to CCLE
CCLE (Common Collaboration and Learning Environment) is a campus-wide IT effort to converge upon a single platform for UCLA's web-based collaboration and learning needs. After conducting a detailed assessment of functional and technical requirements, UCLA decided to base CCLE upon Moodle, an open-source learning management system (LMS).
